www.emecole.com

- Designed to sit on top of the footing, prevents clogging from soil & ground debris
- 6 foot pieces and connectors make for easy transport and on-site assembly
- Can be used with both poured foundation and block foundations
- Less expensive than outside drainage systems
- Baseboard extension directs water seepage to the drain
- Versa-Drain collects the water from the basements perimeter and effectively carries it to your sump pump
- Concrete is poured flush to the baseboard extension for a neat, clean look

Can be installed with or without the baseboard extension
